SAMPLE Rating Form - Nurses

Article Rating Scale

Article:	**Effectiveness of home treatment for elderly people with depression**
Specialty:	**Elderly Care / Geriatrics / Gerontology**
View Article	

1. Relevance to clinical practice in your specialty:

Score	Criterion
	Beyond my personal area of expertise but may be of interest to my specialty
7	Directly and highly relevant
6	Definitely relevant
5	Probably relevant
4	Possibly relevant: likely of indirect or peripheral relevance at best
3	Possibly not relevant
2	Probably not relevant: content only remotely related
1	Definitely not relevant: completely unrelated content area

If you have scored the article more than 2 for relevance, please continue to rate its importance:

2. Newsworthiness to clinical practice in your specialty:

Score	Criterion
	I don't know whether this is newsworthy
7	Useful information, most nurses in my specialty definitely don't know this (unless they have read this article)
6	Useful information, most nurses in my specialty probably don't know this
5	Useful information, most nurses in my specialty possibly don't know this
4	Useful information, most nurses in my specialty possibly already know this
3	Useful information, most nurses in my specialty probably already know this
2	It probably doesn't matter whether they know this or not
1	Not of direct clinical interest
